

The Institute for Ecology and Action Anthropology invites you to the

Hybrid Lunch-Talk:

Indigenous, local and international perspectives on the

'food-climate-health' nexus

on June, 14th 2022 from 11:30am to 14:00pm

at Universitätsclub, Konviktstr. 9 in Bonn

and Online

In Germany, politicians, the media and large sections of society have been intensively concerned with the causes, effects and solutions of the Covid-19 pandemic. The climate crisis and the loss of biodiversity have been pushed into the background. Rarely have the linkages between the various crises been addressed or informed about and discussed. Their causes, effects and corresponding solutions are often considered, communicated and elaborated independently of each other. For example, in the context of combating the Covid-19 pandemic, the link to nutritional recommendations and sustainable agriculture has only been made in passing.

The ['machbar report 2021'](#) addresses the linkages between the climate, health and food crises and makes clear the necessity to perceive the causes and effects of the various crises in their entirety. This is the starting point for our Lunch-Talk, which will bring together indigenous speakers, local experts, and internationally active scientists who will provide diverse perspectives on the nexus of the health, climate and food crises. Drawing on our speakers' special expertise and experience with indigenous foods, indigenous practices and food systems, and local climate friendly agriculture, we will discuss the potential of holistic approaches to finding solutions that address environmental, nutritional, economic, health, human rights, and climate issues in equal measure. We ask ourselves how we can meet the challenges through interdisciplinary and international collaboration.

Tentative Programme

- 11:30 h Welcome
- 11:40 h Thematic input **Mireille Remsch**, Agrarkoordination, Hamburg:
Key challenges of the 'climate, food and health crisis' nexus in and for Germany
- 11:50 h Approaches, perspectives and practical experiences on the health-nutrition-climate nexus:
Simon Peter Longoli, Karamoja Development Forum, Uganda:
Traditional resource use and negotiation mechanisms in times of crisis
Pasang Dolma Sherpa, Center for Indigenous Peoples' Research and Development (CIPRED), Nepal: The role of indigenous women and their knowledge (tbc)
Pedro Coña Caniullan, Nor Kintuafiín, Chile: Indigenous culture and place-based food systems: an example from the Mapuche
Katrina McKee, Food Council Cologne: Edible Cities
Wolfgang Bokelmann, Director Department of Economy of the horticulture production at the Humboldt-University Berlin: The role of indigenous vegetables in improving food and nutrition security. Experiences from the HORTINLEA project in Kenya.
- 12:20 h Round of discussion:
Potential of indigenous and local foods, agricultural practices, traditional knowledge and approaches for holistic solutions to the linked crises?
- 12:45 h Break
- 13:00 h Open Discussion:
Weaknesses, barriers and challenges for local, indigenous and native approaches, varieties, practices and knowledge systems.
How can we address these challenges through interdisciplinary and international collaboration?
- 13:55 h Wrapping up
- 14:00 h End of hybrid Talk event
- Moderation:** **Gertrud Falk**, FIAN

The lunch-talk will take place in English.
