

JUSTICE IS EVERYBODY'S BUSINESS.

Help us tip the scales!

A just world has no place for unjust business. People and the planet have paid the price of **crooked corporations** for too long. And quite frankly, we're over it.

A fairer world is just around the corner: one where business respects the rights of **workers** and the lives and livelihoods of **communities**, elevates producers out of poverty and allows the **planet** to thrive. One where people around the world can get **justice** if they have been harmed by bad business.

Help us stand up for an **EU law** that protects human rights and the climate from corporate exploitation.

Join the movement!

Find our demands on the back **▶▶**

We demand a due diligence law that:

1. Makes companies **respect** human rights, the environment and the climate.

2. Puts strict, no-nonsense obligations on companies to prevent and **end harm**.

3. Holds parent companies **liable** for harm that happens anywhere in their supply chain. No loopholes!

4. Guarantees **collective bargaining** by trade unions and gives workers' representatives a real say in due diligence, every step of the way.

5. Tackles the climate crisis by making companies **slash emissions** throughout their value chains.

6. Protects the planet by holding companies accountable for all possible harms to the **environment**.

7. Applies **due diligence** requirements to all business relationships along their value chains.

8. **Empowers** people harmed by bad business practices, trade unions, and civil society to get justice in EU courts.

9. **Consults** everyone who is, or may be affected by business activities, and obtains **consent** when needed.

10. Gives enforcement agencies the power to thoroughly **investigate** and **sanction** companies.

Your voice is crucial

in holding business accountable.
